

## PRECAUTIONARY MEASURES ON BOARD OUR YACHTS, SO YOU CAN SAIL SAFELY

With the consultation of The World Health Organization (WHO), we have adopted the below measures and sanitation protocols on our vessels.

### Vaccination Policy

for cruises embarking on November 5<sup>th</sup> 2022 onward

- A. **Mandatory COVID-19 VACCINE:** Until further notice, all guests over 15 years old must be fully vaccinated with a current COVID-19 vaccine at least 14 days before embarkation. Proof of vaccination will be required at check-in on the pier prior to embarkation. Variety Cruises highly recommends guests to receive their booster vaccinations for extra protection.
- B. **Mandatory pre-boarding health reporting and screening questionnaire**

**Before you travel it is important to check the COVID related requirements of your destination. Failure to do so can prevent you from entering the country or boarding a plane. To ensure that you are abiding by your destination specific rules and travel regulations, use the country specific resources as mentioned in page # 3**  
**In page #4 you will find links with the available places providing covid-tests.**

FOR FURTHER UPDATES STAY TUNED TO  
<https://www.varietycruises.com/coronavirus-alert>

Variety Cruises recommends guests research each country and its requirements and highly recommends purchasing travel insurance to cover COVID-19 services.

## ON BOARD

We have implemented Health screening measures during the cruise for all guests and crew. This includes:

### General Hygiene Practices & Standards

- Usage of sanitizer dispensers are mandatory at embarkation/disembarkation as well as prior to entry at Restaurant area at meals.
- Tour coaches during our scheduled excursions will be limited with capped capacity. Vehicles will be fully sanitized before each shore excursion.
- The use of mask is not compulsory.

### Guest Accommodations

- All cleaning, sterilization and disinfection material and equipment are ECDC compliant.
- Daily UV sterilization of all staterooms and public areas.
- Additional disinfection of all cabins and internal common areas is taking place every other day using [PureSpace](#) disinfection equipment when passengers are not onboard.
- Higher frequency with increased levels of sanitization and disinfection in guests' cabins with hospital grade disinfectants, including twice daily wipe-down of guest cabins and guests cabin corridors.
- Injection of diluted cleaning solution into drains to avoid clogged pipes and preventing bacterial growth.
- Disinfection of all air-conditioning and ventilation ducts.

### Public Areas

- High-touch areas such as handrails, buttons, table-tops, door handles etc. are sterilized twice per day at Mini Lounge - Bar areas and Restaurant Areas including galleys are sterilized before, during and after service. Upholstery, cushions, curtains are steam sterilized daily.

### Food Hygiene Practices & Standards

- Guest seating will ensure ample spacing; disposable cutlery will be provided, upon request.

### Crew Members

- Our crew is currently vaccinated for the prevention of COVID-19.
- Twice/week Covid-19 Rapid self-tests for all Crew Members.
- Twice daily temperature checks for Crew Members.
- Our Crew receive professional health and hygiene training and undergo multiple familiarization seminars for best practices in cleaning and sterilizing.
- Crew members have undergone courses in crisis and crowd management.
- COVID-19 outbreak seminars are carried out across our fleet of small ship cruises, and an Outbreak Management plan is in place.

### General Practices & Standards

- Adequate stock of antibody tests and emergency crew uniforms are always available onboard.
- Visitors are not allowed to come onboard during the cruise.

Some measures will remain in effect in certain countries and are subject to change at any time as we evaluate the situation and continue to consult with local health authorities as well as the WHO.

Rapid Antigen tests are available at

### Athens / Greece

#### 1. AIA INTERNATIONAL AIRPORT

In the specially designed areas by the Athens Medical Center at the level of Arrival (between exits 2 & 3), it is possible to perform an examination for SARS-COV-2 (Covid 19) with the molecular method PT-PCR or Rapid Test. The service is provided daily 24 hours. Through an appointment is not necessary, is highly recommended. The data registration and payment process on the online platform must be completed in advance to <https://payments.iatriko.gr/>

#### 2. ATHENS TOWN

If you have a pre/ post cruise stay in Athens you may ask for assistance to your hotel reception. All hotels in Athens have an authorized medical laboratory in their nationhood to suggest or they cooperate with local doctors, who can come to your hotel and take your sample.
